Life Test L-02/03

ENVIRONMENTAL SIMULATION

// High Voltage Test Benches

With our team, we can realize complex HV and LV test benches for automotive Life Test requirements.

Equipment

Up to 15.500l of chamber volume

Climatic environment

-70°C to +200°C

Up to 99% r.H.

Current

Over 2.000A

Voltage

Up to 600V

We can provide the planning, programming and project management for your application.

STANDARDS

MBN LV 124-2
VW 80000
GS 95024-3-1

Additionally we work with numerous customer specific standards from the aerospace and defense sectors.
